

Place strip on black area

#### Image requirements

- All 4 markers must be completely on the image
- Test pad(s) must show to the left side
- Image must be focussed

#### Light recommendations

- When you get a „Colour Cast Error“
  - avoid shadow on a sunny day, this may cause a blue color cast
  - avoid using flash, this may also cause a color cast
- When you get „Could not extract“-Error
  - when using flash choose a diagonal angle to avoid overexposure of the image
