**Print this PDF. Make sure the lines below have the assigned length.**

8 cm

4cm

Place strip on the black area below, handle to the right.

Use STRIPSCAN.
Press „TEST NOW" and use your mobile phone to take an image.

Image requirements
- Make sure, that the lines at the top have the correct length in your printout
- All 5 markers must be completely on the image
- Test pad(s) must show to the left side
- Image must be focussed

Light recommendations
- Ensure uniform lighting without shadows
- Shadow an a sunny day can lead to a blue color cast
- Cozy, yellow interior light can lead to a yellow color cast
- When you get a color-cast error, try using forced flash. Choose a diagonal angel when using flash to avoid overexposure
- Avoid using HDR or „high dynamic range" setting
